

ARYAN SHARMA

Full-Stack Systems Engineer

+91 8305824950 • aryanteddys@gmail.com • Indore, India • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Full-Stack Systems Engineer specializing in production-grade Python infrastructures, custom data pipelines, and event-driven automation architectures. Proven track record converting legacy workflows into high-yielding digital structures. Proficient in building modern Next.js dashboards, GraphQL layers, and persistent task pipelines utilizing Redis and PostgreSQL state layers

EXPERIENCE

Full-Stack Systems Engineer

05/2026 - Present

Maa Pitambara Automobiles

- Orchestrated the complete digital transition of a legacy automotive dealership into a high-visibility, automation-driven online operation
- Owned the end-to-end architecture, deployment, and management of the central web platform, structuring reliable core database schemas and automated data pipelines
- Programmed custom automated CRM bot to handle real-time client interaction loops, asynchronous webhooks, and state synchronization

Full-Stack Engineer

10/2025 - 04/2026

Creativefuel

Indore, India

- Developed production-grade Python backend microservices and asynchronous worker nodes using REST APIs, Redis queues, and PostgreSQL state tracking
- Modeled fault-tolerant job life-cycles and failure recovery logic across high-volume assets involving asset downloading, transcription processing, and rendering flows
- Engineered interactive Next.js Dashboards to manage, audit, and evaluate automated content states and AI outputs
- Designed media pipelines with complex FFmpeg rendering DAGs, caption/layout formatting, and backend text canvas constraints

Social Media Executive

08/2025 - 09/2025

Creativefuel

Remote Freelance

- Supervised content distribution operations across high-visibility digital properties with a combined audience of 1M+ followers
- Mapped operational bottlenecks and manual content generation friction points, establishing the logical frameworks for subsequent core automation engines

SKILLS

Languages & Frameworks: Python, Next.js, GraphQL, Java, Spring Boot, React Native, JavaScript, HTML/CSS, Tailwind

Backend & Architecture: REST APIs, Asynchronous Workers, Event-Driven Workflows, Job Orchestration, MVC, OOP

Databases & Cloud: PostgreSQL, Redis Queues, Supabase, Microsoft Azure, Docker

Media & Applied AI: FFmpeg, Rendering DAGs, LLM APIs, Transcription Engines (Faster-Whisper), Schema Validation

PROJECTS

Seone (Media Processing System)

- Built an industry-grade automated media processing pipeline for high-volume video workflows, reducing end-to-end runtime from 30 minutes to under 5 minutes
- Developed backend services to manage multi-stage processing, keeping media assets synchronized across each step of the editing pipeline
- Investigated and resolved rendering edge cases affecting typography, canvas layouts, and export accuracy

ContentLab (Creative Automation Platform)

- Designed an asset generation platform producing brand-consistent multi-frame graphics in 1-2 minutes through deterministic job lifecycles
- Implemented strict Pydantic parsing routines to map raw user intents into sound, structured analytical formatting constraints
- Utilized event/outbox-style backend structural execution patterns to guarantee recoverable, highly reliable workflow jobs

Utility Applications Core Suite

- Developed 9+ specialized utility apps including Agency Cold Outreach (contextual scraping), WaveClip (local audio clipper), and Social Safe-Zone Previewer (9:16 boundary compiler tracking platform UI overlays)
- Engineered local-first tools like Invoice Studio and strict JSON token compilers like Automated Design System to streamline client and internal developer workflows

EDUCATION

Bachelor of Technology in Computer Science and Artificial Intelligence

2021 - 2025

Medi-Caps University

India

- Coursework: Automated architectures, relational database management, and full-stack system implementation
- Research: Co-authored "[Immersive Meditation Experience Using Virtual Reality and Binaural Beats](#)," published in IJAECS (Vol. 12, Issue 7, Jul 2025)

CERTIFICATIONS

Full Stack Software Developer Professional Certificate — IBM • Coursera Verified

Rigorous 10-course credential validating advanced competencies in Python backend, cloud-native deployments, Docker, Kubernetes, React, and CI/CD pipelines.

Credential ID: IBM-FS-2023 • [Verify on Credly](#)

LANGUAGES

English (Near-native) • Hindi (Native)

ACHIEVEMENTS

- Captain of School Basketball team, led team to inter convent state level victory
- District Level Football player
- National Level Gymnastics player in early childhood
