

ARYAN SHARMA

Full-Stack Software Developer & Team Lead

Indore, India | 8305824950 | aryanteddys@gmail.com
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

IBM-certified Full-Stack Developer and Team Lead with hands-on experience architecting AI-powered automation pipelines and scalable cloud systems. Skilled in designing multi-tenant architectures with storage isolation, implementing high-concurrency synchronization primitives, and building production-grade generative AI applications. Proven ability to lead development teams and deliver end-to-end solutions from concept to deployment.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, C++, Java
Frontend	React, Next.js, HTML5, CSS3, Responsive Design
Backend	Node.js, Django, Flask, Spring Boot, REST APIs, GraphQL
AI/ML	LangChain, Google Gemini, OpenAI API, Vertex AI, TensorFlow, PyTorch, OpenCV, NLP
Cloud & DevOps	Google Cloud Platform, Docker, Kubernetes, Firebase, CI/CD, Linux
Databases	PostgreSQL, MySQL, MongoDB, Redis
System Design	Multi-tenant Architecture, Microservices, Distributed Systems, Job Queues

PROFESSIONAL EXPERIENCE

Creativefuel — Indore, India

Full Stack Developer & Team Lead

November 2024 – Present

- Lead a team of developers building a multi-tenant AI video automation platform with secure storage isolation and role-based access control
- Architected scalable backend infrastructure using job queues and stateless workers to process 500+ concurrent video tasks
- Designed and implemented synchronization mechanisms including lock barriers and join barriers for parallel workflow orchestration
- Reduced video processing latency by 40% through pipeline optimization and efficient resource allocation
- Established code review practices and technical documentation standards across the team

Full Stack Developer

October 2024 – November 2024

- Developed full-stack AI tools for content processing and automation using Python, Node.js, and Google Cloud Platform
- Integrated Google Gemini models to automate content workflows including metadata generation and intelligent tagging
- Built video processing pipelines using OpenCV and custom ML models for automated scene detection
- Implemented RESTful APIs serving 10,000+ daily requests with 99.5% uptime

Content Creator

August 2024 – September 2024

- Directed content strategy for social media accounts reaching nearly 1 million followers
- Analyzed engagement metrics and audience behavior to optimize content performance

KEY PROJECTS

Seone: AI Video Clipper

Built an AI-powered video clipping tool that automatically identifies high-engagement segments using scene detection and relevance analysis. Implemented custom ML models for content scoring and automated highlight extraction.

[Python](#), [OpenCV](#), [TensorFlow](#), [React](#), [Node.js](#)

Templatea: AI Video Engine

Engineered a social media video template engine with AI-generated copy and multi-format transformation capabilities. Integrated generative AI for automated caption and description generation.

[Python](#), [Google Gemini API](#), [OpenCV](#), [React](#), [PostgreSQL](#)

Content Lab: Generative AI Platform

Developed a text-to-graphics tool with custom prompt engineering pipelines for automated visual content creation at scale.

[Python](#), [Google Gemini](#), [React](#), [Node.js](#), [GCP](#)

FileSage: AI System Agent

Created an intelligent file organization agent supporting natural language commands with LLM integration for seamless file management.

C++, Python, LangChain, OpenAI API

CERTIFICATIONS

IBM Full-Stack Developer Professional Certificate
